TECHNICAL EXHIBIT
IN OPPOSITION TO
A PETITION FOR RULE MAKING
TO AMEND THE FM TABLE OF ALLOTMENTS
CLINTON, FISHERS, LAWRENCE AND INDIANAPOLIS, IN

Technical Narrative

This technical narrative and associated exhibits have been prepared on behalf of FM station WPFR, Clinton, IN, owned by Word Power, Inc., (herein "Word Power") in opposition to a Petition for Rule Making, filed by Indy Lico, Inc., to amend Section 73.202(b) by the re-allotment of channel 230A from Fishers, Indiana to Lawrence, Indiana, reclassification from Class A to B1 and the modification of the license of WISG on channel 230A at Fishers, Indiana, accordingly.

Indy Lico, Inc. is also proposing that in order to provide a replacement service at Fishers, Indiana, the licensee of WFMS on channel 238B at Indianapolis, Indiana concurrently request the re-allotment of channel 238B from Indianapolis to Fishers and the modification of WFMS's license accordingly. WFMS already serves Fishers, IN and will not be providing a new service. No actual change in service to anyone in the WFMS listening area would occur. This claim of a replacement service is patently untrue.

Indy Lico, Inc. also is proposing to substitute channel 229A for channel 230A and the modification of the license of WPFR, currently on channel 230A, at Clinton, IN, accordingly.

Word Power provides a unique service to its area with its educational operation. Much of the area between Clinton, IN and Indianapolis, IN has no educational FM broadcast service and some of the area has only one (1) educational service. Word Power presently

provides a unique service far beyond its 60dBu contour which would be completely obliterated by the proposed class B1 IBOC* service to a purportedly un-served community of Lawrence, IN. Lawrence, IN presently is well served by a multitude of FM broadcast services. Its need for yet another FM service is far out-weighted by the much greater need for a first or second educational service in the area between Clinton, IN and Indianapolis, IN. WISG now operates with IBOC, causing additional adjacent channel interference, which would destroy the existing WPFR service to much of the area with no educational service.

Word Power requests that if Indy Lico wants to present a local service to Lawrence, IN, it can easily be accommodated and Word Power can increase to class B1, at the same time, if Indy Lico were merely assigned a class A allocation transmitter site to the east of Lawrence, IN.

- Charlie Morgan informed Paul Dean Ford that WISG would continue transmitting IBOC

Proposed Change in Table of Allotments (Counter Proposal)

It is proposed that the Commission amend the table of allotments, as follows:

City	Present	Proposed
Clinton, Indiana	230A	230B1
Fishers, Indiana	230A	238B
Lawrence, Indiana	none	230A
Indianapolis, Indiana	226B, 234B, 238B	226B, 234B, 242A,
	242A, 277B, 289B, 300B	277B, 289B, 300B

The attached is a tabulation of required separations pertinent to use of 230A at Lawrence, IN. The reference site complies with the Commission's minimum distance separation requirements contained in section 73.207 to all existing, authorized and proposed stations and allotments. Operation from the allotment reference site will provide the requisite city grade signal to all of Lawrence.

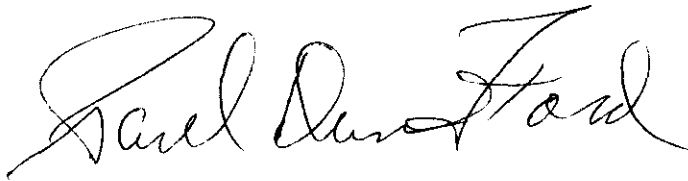

Attached is a map showing the area to locate for channel 230A at Lawrence in compliance with the Commission's minimum distance separation requirements and city coverage requirements based on maximum Class A facilities (ERP 6kW/HAAT 100 meters). The Lawrence city limits shown on Figure 2 were obtained from a map contained in the 2000 U.S. Census of Population.

Attached is a map showing the area to locate 230B1 at Clinton, IN in compliance with the Commission's minimum distance separation requirements and city coverage requirements based on maximum Class B1 facilities (ERP 25kW/HAAT 100 meters). The Clinton, IN city limits are shown.

Attached is a tabulation of required separations pertinent to use of 230B1 at Clinton, IN. The reference site complies with the Commission's minimum distance separation requirements contained in section 73.207 to all existing, authorized and proposed stations and allotments. Operation from the proposed new allotment site for Clinton, IN class B1 will provide the requisite city grade to all of Clinton, IN.

Attached is a map showing the areas and populations that will receive a first (1st) and second (2nd) education service from the proposed allotment of 230B1 to replace 230A at Clinton, IN.

Petitioner requests the allotment of channel 230B1 in Clinton, IN to replace 230A.

A handwritten signature in black ink, reading "Paul Dean Ford". The signature is fluid and cursive, with the first and last names being more prominent.
